

Monolith™ Customizable

MS80

MS48

The Monolith™ universal pedestal is the perfect support for mounting industry leading level 2 EV charging stations. It is available in two sizes (48", 80") and designed to support up-to two EV charging units. The Monolith™ enables contractors to convert their customer's parking spaces into charging places.

FEATURES

- Constructed from heavy gauge sheet metal (18g, 14g & 11g) and plate metal (1/4" & 1/8") aluminium
- 8" wide faces allows not only a range of Level 2 EV charging units to be mounted and offers branding real estate
- Base plate has 3 conduit holes offering single or daisy chain configuration.
- Cable management mechanism with auto-retraction and self-locking is extendable up to 3M (~10 ft) in length. Dual retractors come as standard on the 80".
- Security bolts are used to prevent tampering and unauthorized access
- Back panel is removable for easy access for servicing
- Interior plate for mounting junction boxes
- Polished finish (add-on) or hi-grade powder coating available in four colours but not limited to:

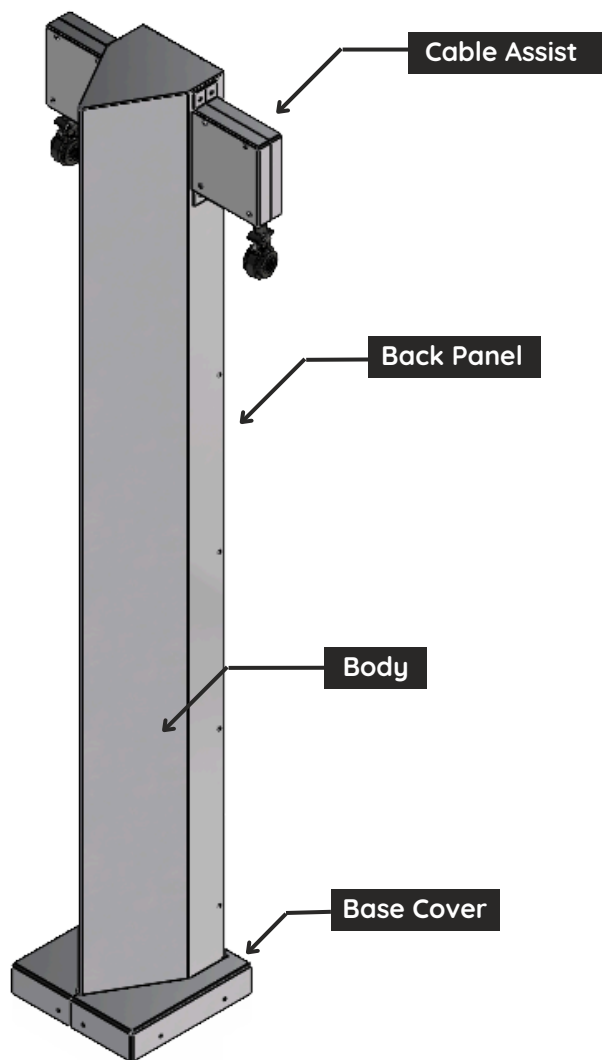

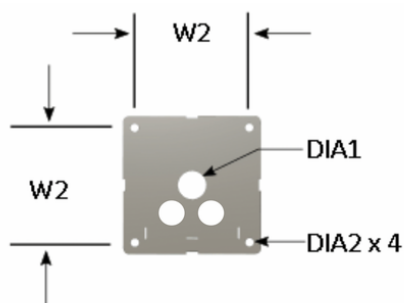

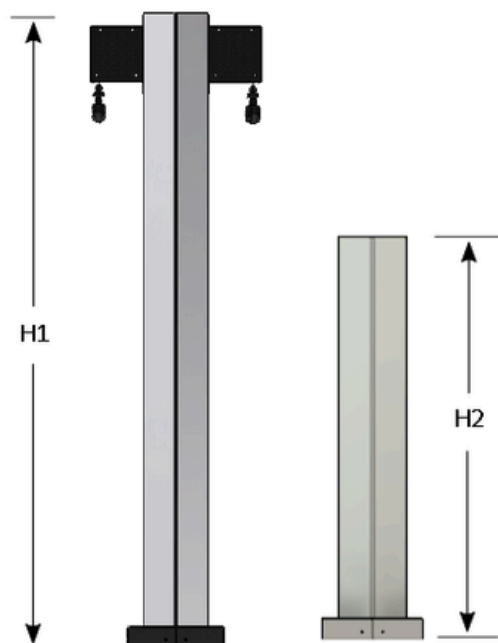

LIT SIGNAGE OPTION

- Illumination LED ring can be located on top of the Monolith.
- Powered by a Class 2 power supply: 120 - 220VAC input
- Choice of six colours or controllable RGB

SIGNAGE PACKAGE OPTIONS INCLUDE

- Premium outdoor rated vinyl on all surfaces
- Stand-off panelling
- Illuminated custom shaped signage
